

Exhibit D

**UNITED STATES DISTRICT COURT
DISTRICT OF MASSACHUSETTS**

ROBENSON JEAN-PIERRE and JEAN
METELUS, on behalf of themselves and all
others similarly situated,

Plaintiffs,

v.

J&L CABLE TV SERVICES, INC.;

Defendant.

Case No.: 1:18-cv-11499-MLW

DECLARATION OF MOISE LEVEILLE

DECLARATION OF MOISE LEVEILLE

I, Moise Leveille declare:

1. I have personal knowledge of the facts stated in this declaration and would testify to those facts if called upon to do so.
2. I am an adult resident of Boyton Beach, Florida.
3. I worked as a Field Technician for J&L from approximately November 2016 through December 2017.
4. I worked in the West Palm Beach/Boca Raton, Florida branch.
5. During this entire time, J&L classified me as a non-exempt employee.
6. J&L installs and maintains communications products throughout Florida and Massachusetts as well as the United States.
7. During my time working for J&L, I performed various services related to the installation and repair of wireless services for J&L's clients; specifically, Comcast. The services included, but were not limited to: installing cable, internet and phone; troubleshooting, running

new telephone lines; running coax cables for new outlets; installing ground cable; educating customers on equipment; providing customer service; and replacing and installing drops.

EXPERIENCE WORKING AT J&L AS A FIELD TECHNICIAN

TYPICAL WORK DAY

8. Throughout my tenure as a Technician for J&L, I often arrived to work at 7:00 a.m. each day. My day typically began at the warehouse, where I would spend between twenty (20) and thirty (30) minutes a day to wait in lines with other Technicians to pick up equipment and load up my truck with equipment. It is my understanding that I was not paid for this time worked.

9. I was also required to report to the warehouse once per week, for roughly one hour before I started the day's jobs, so that J&L could perform an inventory check of the equipment in my vehicle and so I could obtain additional equipment, e.g., modems, cable boxes, including DTA (type of cable box), remotes, cable cords, coax cables, telephone line cubes, electrical tap, stickers, signs, nails, silicone, staplers, Ethernet cable, amplifiers, tie wrap, ground wire, DVR boxes, grounders (for aerial drops), splitters, fittings, plastic moldings and wood putty from J&L. My supervisor, Mike, instructed me not to write down the time spent during these inventory check-ins on my time sheets. It is my understanding that I was not paid for these additional hours of work.

10. J&L required me to attend mandatory weekly meetings to discuss installations and ways to increase productivity. These meetings were typically between thirty (30) minutes to one and a half hours (1.5 hours) each week. Like other Technicians, I was required to, and did, attend these mandatory meetings. It is my understanding that I was not paid for attending these meetings.

11. J&L notified me of my jobs for the day between 6:00 a.m. and 7:00 a.m. through “Tech Net,” which is the application J&L used to assign jobs for the day and to monitor my activities. In addition to being notified by Tech Net, my supervisor, Mike and my supervisor, Steve, would call me on my personal cellphone if I had not logged in to Tech Net by 7:00 a.m. When I first started working at J&L, I used my personal cellphone to log into Tech Net.

12. Typically, J&L assigned me between five (5) and eight (8) jobs per day. J&L assigned me as many as ten (10) jobs in a single day. J&L limited the allotment of time for each job to a two (2) hour time frame. Individual jobs typically took between thirty (30) minutes and four (4) hours to complete, however, one job could take an entire day to complete. There were many times, I was double booked for time slots. For example, I was assigned two (2) different jobs in the 8:00 a.m. to 10:00 a.m. time slot. Some days, even though J&L assigned me a full work load, J&L would force me to help out other Technicians. J&L did not count this toward my jobs assigned per day. Therefore, in addition to the total jobs assigned per day by J&L, my total jobs for the day would increase by as much as three (3) extra jobs per day.

13. Jobs were added and taken away from me on Tech Net during the course of the day. Throughout my employment, I would click on a job J&L assigned to me on Tech Net, accept the job, enter the job location in the GPS and drive to the customer’s home. Once I accepted a job, an automatic text message is generated to the customer that a Technician is on the way. When I arrived at the job and parked the truck outside the customer home, I entered Tech Net again to update my status as “signed in.” After signing into a job, an additional text message is sent to the customer that the Technician has arrived. However, between two (2) and three (3) times a week, J&L would erase the job from the system, taking away the job from me even though I already arrived at the customer’s home. On many occasions, I called my supervisor,

Mike to complain that the job was taken away. Mike said, "I didn't log into the job correctly." This is not accurate because once I logged into Tech Net, the job turned "green" which showed I accepted the job. I took screen shots and texted them to Mike to show that I signed into the job properly. It was my understanding that I was not paid for the time spent on Tech Net, the time spent driving to and from the customer location, and the time spent on the phone with the supervisor.

14. Similarly, J&L would also regularly take jobs away from me when I was in the middle of a job or had completed the job, but had not yet signed into Tech Net to "close out" of the job to indicate that I completed the job. I would call Mike to complain. This was especially frustrating, given that many times I finished the job assigned and the only step left was to close out the job. This was rarely resolved and it is my understanding that J&L did not enter any piece-rate codes for the jobs I completed and did not record the time spent working on a job if I did not close out of a job. It was my understanding that I was not paid for this time.

15. After I completed a job, I would drive to the next job. The drive time between jobs often took between fifteen (15) minutes and forty-five (45) minutes, and sometimes as long as one (1) hour. J&L, however, made me underreport my drive time.

16. Throughout the day, I was also required to assist other Technicians with their jobs. Only the Technician that was originally assigned the job was paid for the job completed. It was my understanding I was not paid for this time.

17. My day usually ended between 7:00 p.m. and 8:00 p.m. There were many days I finished at 9:00 p.m. After I finished my last job, I drove directly home. I did not return to the warehouse until the next morning of work.

18. In total, I would work between six (6) and seven (7) days per week, between twelve (12) hours and fourteen (14) hours per day, and between seventy-two (72) and ninety-

eight (98) hours per week. I was not forced to work on Sunday, but I did it to earn extra money; however, my pay stubs never reflected the true amount of hours and codes I completed.

MEAL AND REST BREAKS

19. The number of jobs assigned in a given day, the amount of time jobs typically took to complete, and the pressure placed upon me by supervisors to complete all daily assignments made it nearly impossible to take meal and rest breaks. J&L did not make rest breaks available to me, and generally, my work schedule was too busy to take a rest break.

20. I was typically not provided with a meal period, during which I was relieved of all duties. I was directed by my supervisor to work through my meal periods. Any time I took to eat would typically take place while I was driving from one job to another, and even then, I was required to have my cellular telephone on me at all times and be available to respond to any work calls. J&L required me to enter I took a meal break, when in fact I typically ate in my truck while driving to the next job. If I did not enter that I took a meal break, J&L's billing department would enter that I took a meal break.

COMPENSATION

21. Based on my wage statements alone, it was not clear to me how J&L computed my wages. My wage statements said I was paid on an hourly basis and did not reflect any piece rates, but I was told I was compensated on a piece rate basis. While working for J&L, I entered codes for the various job tasks I performed, and each of those codes corresponded to a specific dollar amount. I was also required to keep track of my hours, and submitted my hours to J&L. Though my wage statements made it impossible to know exactly how J&L determined my wages, I believe my compensation was on a piece rate and hourly basis.

22. While J&L made it impossible for me to know how they computed my wages, I know J&L did not pay all the wages I earned in a variety of ways. For example, J&L would

regularly delete piece-rate codes for tasks I had completed, or change the codes to a lower paying code. J&L would also instruct me not to enter a code at all, even though I completed the corresponding task. I was also told not to enter any piece rate codes when assisting other Technicians with jobs.

23. J&L would also instruct me to underreport my time. J&L typically required me to write that my start time began an hour after I actually started working. J&L also typically required me to write that I stopped working several hours before I actually stopped working. If I did not underreport my time as instructed, J&L regularly would manipulate my time cards to reduce my total work time. Both Steve and Mike, my technician supervisors, instructed me to reduce my true hours worked in order to show higher production and increase my hourly rate. My technician supervisor Steve said, "If you want to see your production, you need to show you worked less hours." My technician supervisor, Mike said, "Make less hours and it will show more money on your pay check."

24. Based on my interactions and conversations with other Technicians, J&L regularly deleted or changed piece rate codes for tasks I completed and regularly manipulated my time entries. I was instructed to underreport my time and based on my conversations with my co-workers, it is my understanding that other field technicians were not paid the accurate overtime wages.

25. In order to do my job, I had to purchase various tools and equipment, such as a wireless drill, drill bits, pliers, screwdriver, staple gun, nails, splitters, strippers, safety vest, wrench, crimper, safety glasses, many types of cable, gasoline for trucks, cable caddy, ladder belt, boots and pants. Because J&L did not provide proper tools and equipment, I was forced to sign the "J&L Loan Agreement." This agreement stated that J&L was to loan me the funds in

order to finance the purchase of tools I needed to complete jobs assigned to me by J&L. My paystubs reflected deductions for the tools and equipment necessary to purchase in order to complete the jobs.

26. Further deductions were also made from my pay. If a customer called back with the same service issue, or something was not working properly, replacement parts were deducted from my pay. I understand that lost equipment was also deducted from my pay.

27. J&L also failed to provide accurate wage statements. My pay stubs showed several regular and overtime rates, without ever explaining which rates applied to a given job, day's or even week's work. My pay stubs did not reflect my piece-rate activity. I believe the wage statements were inaccurate as they did not include the all the hours I worked, did not include compensation for missed meal and rest periods, and did not include all of my piece rates.

I declare under penalty of perjury under the laws of the State of Florida that the foregoing is true and correct and based upon my own personal knowledge.

Executed on this ⁰⁴_____ day of December, 2018.
